ASSEMBLY

1. The hardware for attaching the upper handle to the lower can be found in the parts bag. Install the upper handle (item #24) to preassembled lower handles (item #25 and #26) by sliding the upper handle over and down the inside of the lower handle. Using bolt (item #12), washers (item 10) and lock nut (item #11), install upper handle to lower handle. Finish installing the other side of the upper handle assembly using screw and lock nut provided. The Aim-and-Shoot™ is not attached, you will need to unroll the cable and attach the ball end to the lever and seat the cable end into the hole on the saddle clamp, with the cable running through the slot. To keep the cable from being damaged, use three ty-wraps (item #61) to secure it to the handle as shown, making sure that the cable is not rubbing against the tire. (See Fig. 1)
2. Attach the front tire using the hardware located on the front wheel bracket. Use a block to raise the front end of the unit off the ground. Insert the wheel spacer (item #17) into the wheel and place in between the bracket. Finally insert the bolt (item #20) through the bracket, wheel, and spacer and secure with the nut (item #27). (See Fig. 2)
3. Connect spark plug wire.

OPERATION

BLOWING OPERATION

Your Billy Goat Force™ blower is equipped with an air director cone and the patented Aim-N-Shoot™ control lever to allow the operator to direct the air stream up or down as required to assist in moving debris. This feature is extremely useful when debris has piled up to the point that it cannot be blown any farther. The air stream can be directed upward to blow the top of the debris pile over and allow the operator to continue moving more debris farther.

ADJUSTING AIR DIRECTOR

To adjust air direction, squeeze Aim-N-Shoot control lever. When you want to blow debris at the same angle for an extended period, choose a suitable position and use the finger controlled push button lock to lock the cone in position. For operations that do not require the use of the Aim-N-Shoot feature, the manual adjustment knob, pictured below, can be used to permanently lock the cone into position. *NOTE:* be sure to release the knob when returning to using the Aim-N-Shoot (See Fig. 3).

⚠ DO NOT position director cone to where it will blow debris towards people, vehicles or other objects in vicinity. Flying debris may damage, harm, or cause injury to people or objects in air flow range.

Fig. 3

MAINTENANCE

PERIODIC MAINTENANCE

Periodic maintenance should be performed at the following intervals:

Maintenance Operation	Every Use	Daily or Every 5 Hours	Every 100-150 Hours
Inspect for worn or damaged parts	●		
Check for excessive vibration		●	
Inspect impeller for cracks or damage			●
Inspect for loose parts		●	

IMPELLER REMOVAL

1. Wait for engine to cool and disconnect spark plug.
2. Remove housing front cover by removing the ten screws from around outside of front cover and the exhaust knob (item #22) and nut (item #14).
3. Remove impeller bolt (item #29), lock washer (item #7) and washer (item #28).
4. **DO NOT** pry on impeller. Pull on center hub area only of impeller. If impeller slides off freely, proceed to (step 6).
5. If the impeller does not loosen, use a pry bar against the back of the hub and the plate and apply pressure to separate the impeller from the shaft. **DO NOT** use the pry bar to apply pressure to any plastic part such as the impeller or the main housing. Using a penetrating oil can help loosen a stuck impeller.
6. Reinstall new impeller in reverse order of removal.
7. Tighten impeller bolt. Torque impeller bolt (see Parts List on page 10 for proper impeller bolt torque specifications).

FORCE™ 601V BLOWER Owner's Manual

TIRE AIR PRESSURE

Check at regular intervals and maintain.

Rear Tires - 20 Psi (137 kPa).

TROUBLESHOOTING

Problem	Possible Cause	Solution
Abnormal vibration	Loose or out of balance impeller. Debris in impeller. Loose engine.	Check impeller and replace if required. Clear debris with compressed air or a backpack blower (See Fig. 4 and 5 below).* Check engine.
Engine will not start	Engine not in full choke position. Out of gasoline or bad, old gasoline. Spark plug wire disconnected. Gas valve off. Dirty air cleaner.	Check choke position. Check gasoline. Connect spark plug wire. Turn on gas valve. Clean or replace air cleaner. Contact a qualified service person.
Engine is locked, will not pull over	Engine problem.	Contact an engine servicing dealer for engine problems.
Aim-N-Shoot™ lever sticking	Debris stuck around cone. Cone adjustment knob too tight. Adaptor mount nut (item #43) too tight.	Clean debris. Apply silicone based lubricant to pivot points. Loosen manual adjustment knob. Loosen nut.

*Using compressed air, or a backpack blower, you can loosen or free debris easily from the impeller and housing, which can cause wear and tear on the machine. You can manually remove debris by taking off the front housing.
NOTE: Always disconnect the spark plug when servicing.
